

Current status report by returned trainee

Nov.14, 2023

We have received a message from Ms. Fufa Ayantu Yadachu from Ethiopia, who participated in the training course on "Urban Management for Sustainable Urban Development (A)" held in 2019, regarding her recent activity and experience in the field as below.

After I took training at JICA Kyushu Japan in 2019, I have been working in ministry of Urban and Infrastructure at different positions by now I am working as advisor of the minister. We established JICA Ethiopia Alumni Association in 2022 and participated in different national programs like mitigating environmental degradation by reforestation at which Ethiopia is becoming exemplary for other countries.

By now I am working on urban and infrastructure development and the photo attached shows that we are participating on urban greenery with other JICA Alumni.

Last week my institution Ministry of Urban and Infrastructure in collaboration with the World Bank has secured a Technical Assistance project on Quality Infrastructure Improvement from Japanese Government to support quality improvement initiatives in Urban Institutional and Infrastructure Development Projects, roads and housing sectors. And I am happy about that and update you on the progress.
